# 1. Main Findings

The top 25 sustainable funds invest big in mining:

They have a higher proportion of mining companies than the S&P 500.

**4.0%** v.s. **2.5%**

4% of these funds contain mining companies; the S&P 500 index has less than 2.5% in mining

## 2. Main Findings

However, they are more selective with mining companies ESG ratings

**AA+** v.s. **BBB+**

They strongly prefer MSCI AA+ rated companies versus a BBB+ preference for their overall portfolios.

# What Does This Mean for You, **A Mining Company?**

Higher ESG ratings will gain the interest of ~\$35B pool of funds, which sets trends for a larger \$41 trillion pool of ESG linked funds.

Having an ESG rating in the leadership category (AA, AAA) is **more important than other industries.**

# What Does This Mean for You, **A Mining Company?**

Despite the challenges of mining to the environment and society

- sustainable investment funds appear more open to investing in mining companies, increasing the opportunity, **if a mining company achieves the higher ESG rating thresholds.**

# The **Experts** on ESG in Mining

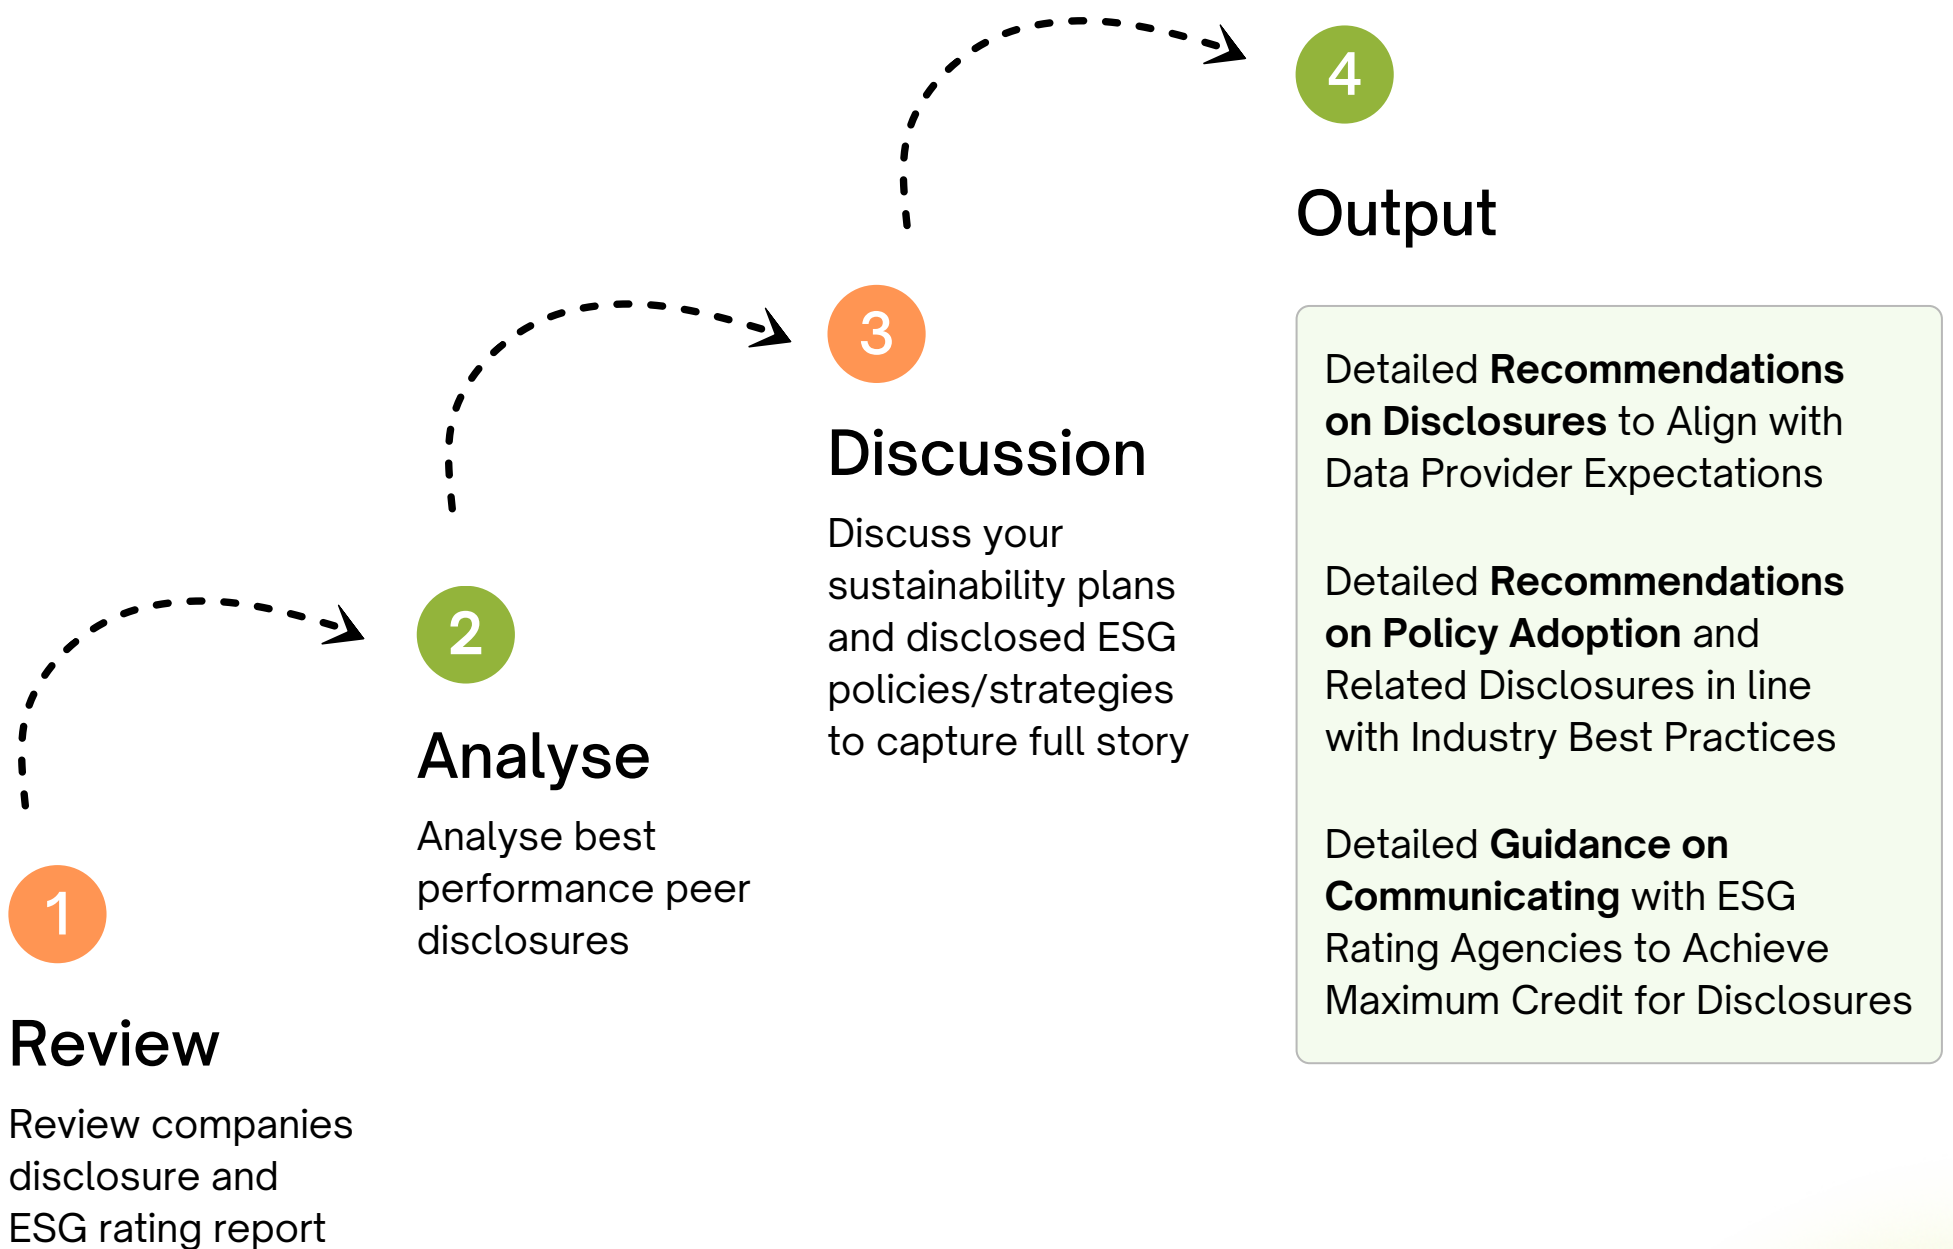

**Michelle McCulloch** led the mining ESG ratings team at Sustainalytics for five years and has spoken at PDAC, where she'll return in 2025.

**David Frazer** drove ESG strategy for a \$500M fund, advised numerous mining companies on disclosures, and researched biodiversity risks in the sector.
