

INTRODUCING FRUIT'S **CLIMATE ANALYTICAL SERVICES**

Climate risk is more financially material than ever – and investors increasingly rely on credible climate disclosure.

WHAT WE DELIVER

Climate Disclosure Diagnostic

Gap assessment against ISSB/IFRS S2 (and CSRD/ESRS where relevant) plus best-in-class peers - turned into a clear, prioritized roadmap.

Climate Targets & Transition Planning

Support on emissions baselines (Scopes 1-3 where feasible), sector pathway benchmarking, and SBTi-aligned target-setting / transition-plan building blocks.

Physical & Transition Risk Analysis

Forward-looking scenario analysis using widely used pathways (e.g., NGFS/IEA) to stress-test exposures and strengthen investor-facing narrative and governance.
